Additional identifiers

Study information

Scientific Title

Study objectives
To compare the package of the care for patients with minor injuries provided by nurse practitioners with that provided by junior doctors.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Ethical approval was obtained for the study from the local research ethics committee.

Primary study design
Interventional

Study design
Randomised controlled trial

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Burns

Interventions
Care by junior doctor versus care by nurse practitioner

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
Adequacy of care provided by the nurse practitioner or junior doctor.

Key secondary outcome(s)
1. Patient's satisfaction with the quality of their care
2. Improvement and return to usual activities
3. Need for unplanned follow-up

Completion date
04/08/1997

Eligibility

Key inclusion criteria
Patients presenting at accident and emergency department with minor injuries.

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group

Not Specified

Sex
Not Specified

Key exclusion criteria
Not provided at time of registration

Date of first enrolment
10/02/1997

Date of final enrolment
04/08/1997
