Study information

Scientific Title

Study objectives

Do different extensor tendon rehabilitation regimes produce different outcomes in terms of range of motion, grip strength and patient satisfaction?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Surgery: Tendon repair

Interventions

Patients randomised to two groups to receive 1 of 2 regimes.

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome(s)

Range of motion, grip strength and survey for assessment; patients assessed at 4, 8 and 12 weeks post-operatively.

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/08/2003

Eligibility

Key inclusion criteria

Plastic surgery outpatients referred for hand therapy following extensor tendon repair in zones 3-7.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria
