Study information

Scientific Title

Study objectives

To determine whether VNUS is as effective as groin re-exploration for recurrent varicose veins in association with a recurrently incompetent long saphenous vein (LSV). Assessment will be by Duplex scan at 6 weeks, 1 year and 5 years.

Ethics approval required

Old ethics approval format

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Cardiovascular: Recurrent varicose veins

Interventions

VNUS closure compared with groin dissection and long saphenous vein (LSV) stripping for recurrent varicose veins

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Operative time, visual analogue scales for pain and bruising, costs of procedure, recurrence rates.

Key secondary outcome(s)

Not provided at time of registration

Completion date

12/12/2004

Eligibility

Key inclusion criteria

Age 18-80

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Lower age limit

18 Years

Upper age limit

80 Years

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

31/07/2002

Date of final enrolment

12/12/2004
