Study information

Scientific Title

Randomized international FAB/LMB96 trial for intermediate risk B-cell non-Hodgkin lymphoma in children and adolescents: it is possible to reduce treatment for the early responding patients.

Study objectives

Not provided at time of registration

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Lymphoma (non-Hodgkins), leukaemia (acute)

Interventions

1. Arm A: A single course of cyclophosphamide, vincristine, prednisolone (COP) followed by two courses of chemotherapy with cyclophosphamide, vincristine, prednisolone, adriamycin, hydrocortisone and methotrexate (COPADM). Patients then receive two courses of etoposide alternating with a single dose of methotrexate. This is followed by four courses of maintenance therapy.

2. Arm B: A single course of COP followed by two courses of COPADM. Patients then receive two courses of reduced dose etoposide alternating with a single dose of methotrexate. This is followed by a single course of maintenance therapy.

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Cyclophosphamide, vincristine, prednisolone (COP) Cyclophosphamide, vincristine, prednisolone, adriamycin, hydrocortisone and methotrexate (COPADM).

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

15/06/2001

Eligibility

Key inclusion criteria

1. B-large cell, small non-cleaved non-Hodgkin's disease or B-cell leukaemia
2. Stages I-IV
3. Aged over 6 months and under 18 years
4. No previous chemotherapy. Emergency radiotherapy or immunotherapy is permitted
5. No congenital immunodeficiency
6. No prior organ transplantation
7. No previous malignancy of any type
8. No medical contraindications to protocol treatments
9. Patients available for a minimal follow-up of 36 months

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Lower age limit

6 Months

Upper age limit

18 Years

Sex**Key exclusion criteria**
