Protocol serial number

N/A

Study information

Scientific Title

Study objectives

That subcutaneous prophylactic adrenaline reduces the number of adverse anti snake venom reactions

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Prevention

Health condition(s) or problem(s) studied

Anaphylactoid or Pyrogenic reactions to anti snake venom

Interventions

Subcutaneous Adrenaline will be administered before ASV. Control: Placebo. All outcomes will be monitored.

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Adrenaline

Primary outcome(s)

Level of adverse reactions

Key secondary outcome(s))

Severity of reactions

Completion date

01/10/2008

Eligibility**Key inclusion criteria**

1. Snakebite with systemic symptoms
2. Requirement for ASV
3. Consent

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

1. Severe atopic diseases such as asthma
2. Acute cardiac conditions
3. Pregnant women and children <15 years

Date of first enrolment

01/10/2005

Date of final enrolment

01/10/2008

Locations**Countries of recruitment**

India

Study participating centre

Little Flower Hospital and Research Centre
