Study information

Scientific Title

Study objectives

To determine the influence of different forms of transplant on the immunity against pneumococcus in children who had already acquired this immunity before transplant.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Infections and Infestations: Pneumococcal infections

Interventions

Randomised test intervention versus standardised intervention, non-blinded (Phase 3)

Intervention Type

Drug

Phase

Phase III

Drug/device/biological/vaccine name(s)

Pneumococcal vaccine

Primary outcome(s)

This study will determine the most efficacious way of administration of pneumococcal vaccine between the two given schedules.

Key secondary outcome(s)

Not provided at time of registration

Completion date

31/03/2006

Eligibility

Key inclusion criteria

Children receiving Haemopoietic Progenitor Transplants

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

12/02/2003

Date of final enrolment

31/03/2006

Locations

Countries of recruitment

United Kingdom

England
