Study information

Scientific Title
Does glucose analgesia have a role in infants in an emergency department

Study objectives

To determine whether sucrose analgesia is as adequate in infants as in neonates

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised placebo controlled parallel group trial

Study type(s)

Other

Health condition(s) or problem(s) studied

Surgery: Analgesia

Interventions

Double randomised controlled trial. Infants randomised to:

1. 50% sucrose solution
2. Placebo solution

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

31/05/2004

Eligibility**Key inclusion criteria**

60 infants attending the emergency department and requiring a painful procedure

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Sex

All

Key exclusion criteria

Does not meet inclusion criteria

Date of first enrolment

01/10/2003

Date of final enrolment

31/05/2004
