Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Mental and Behavioural Disorders: Self harm

Interventions

Cognitive therapy intervention vs standard care

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

1. Beck Scale for Suicide Ideation (BSSI)
2. Duration of Level One Observation
3. Length of Stay.

Key secondary outcome(s)

Not provided at time of registration

Completion date

30/12/2006

Eligibility**Key inclusion criteria**

Patients admitted to the adult acute in-patient wards in Newcastle & North Tyneside with suicide ideation and at significant risk of Deliberate Self Harm.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

1. Diagnosis of personality disorder
2. Diagnosis of organic disorder
3. Incapacity to consent
4. Unable to comprehend English

Date of first enrolment

01/11/2004

Date of final enrolment

30/12/2006
