## Additional identifiers

### Protocol serial number

RBG 99X23

## Study information

## Scientific Title

### Study objectives

The project will evaluate a recently developed initiative to provide residential rehabilitation in social services homes for frail older people at risk of needing institutionalisation or extensive long-term home care packages.

### Ethics approval required

Old ethics approval format

### Ethics approval(s)

Not provided at time of registration

### Primary study design

Interventional

### Study design

Randomised controlled trial

### Study type(s)

Quality of life

### Health condition(s) or problem(s) studied

Not applicable

### Interventions

Not provided at time of registration

### Intervention Type

Other

### Phase

Not Applicable

### Primary outcome(s)

Not provided at time of registration

### Key secondary outcome(s)

Not provided at time of registration

### Completion date

31/01/2003

## Eligibility

### Key inclusion criteria

If the service has a capacity for 20 consenting clients, with an average length of stay of 40 days (pilot work), and assuming 80% capacity is maintained, then 150 clients could be managed in one year.

**Participant type(s)**

Patient

**Healthy volunteers allowed**

No

**Age group**

Senior

**Sex**

Not Specified

**Key exclusion criteria**

Not provided at time of registration

**Date of first enrolment**

01/02/2000

**Date of final enrolment**

31/01/2003

**Locations****Countries of recruitment**

United Kingdom
