Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Atopic dermatitis

Interventions

Questionnaire; Randomised controlled trial. Random allocation to:

1. Treatment A - oral antibiotics
2. Treatment B - bathing in potassium permanganate

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Quality of life during and after the trial measured by the Children's Dermatitis Quality of Life Index

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/11/2003

Eligibility**Key inclusion criteria**

Patients will be recruited from St James's University Hospital (SJUH) and Leeds General Infirmary (LGI) Outpatients Dermatology Clinic who has infected eczema (age range 3 months to 16 years)

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Lower age limit

3 Months

Upper age limit

16 Years

Sex

All

Key exclusion criteria

Does not match inclusion criteria

Date of first enrolment
