Study information

Scientific Title

Trapezium implant versus sling procedure in the treatment of thumb carpometacarpal arthritis: a randomised, assessor-blinded controlled trial

Study objectives

Does a trapezium sling offer no extra benefit in the treatment of thumb metacarpal arthritis over the sling procedure alone?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Musculoskeletal Diseases: Osteoarthritis of the thumb

Interventions

Trapezium sling offer vs sling procedure alone. Patients who have had the procedure and patients who have not had the procedure will be assessed.

Intervention Type

Procedure/Surgery

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/05/2004

Eligibility**Key inclusion criteria**

1. Female
2. Aged 50-80 years

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Mixed

Sex

Female
