Study information

Scientific Title

Randomised controlled trial of the cost-effectiveness of water-based therapy for lower limb osteoarthritis

Acronym

ROAR

Study objectives

Hydrotherapy is believed to be an effective treatment for osteoarthritis (OA). Many physiotherapy centres have specialise hydrotherapy pools but, most remain under utilised because they are not cost-effective to run. Thus a valued service is unrealised on cost grounds. In recent years, aqua- aerobics has become a popular mode of exercise and is used by many people who suffer from "joint" problems. Despite this growth in popularity, neither the efficacy nor the cost-effectiveness of community-based water therapy in the rehabilitation of OA has been evaluated in a well-designed trial. The potential value of this form of treatment to the NHS, therefore, remains unknown.

A randomised controlled trial is proposed, to determine:

1. The efficacy of water exercise in the treatment of OA of the lower limb
2. The cost-effectiveness of such an approach
3. The longer term implications of such intervention

Stages 2. and 3. will be contingent on the outcome of stage 1.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration.

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Musculoskeletal diseases: Arthritis (osteo)

Interventions

1. Hydrotherapy
2. Standard care

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Pain score on the Western Ontario and McMaster Universities OA index (WOMAC).

Key secondary outcome(s)

Additional outcome measures were included to evaluate effects on quality of life, cost-effectiveness and physical function measurements.

Completion date

30/09/2003

Eligibility

Key inclusion criteria

Patients suffering lower limb osteoarthritis

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Senior

Sex

All

Key exclusion criteria

Not provided at time of registration.

Date of first enrolment

01/04/2000

Date of final enrolment

30/09/2003

Locations

Countries of recruitment

United Kingdom

England
