Study information

Scientific Title

Study objectives

To determine whether a self directed, hospital supervised rehabilitation program after shoulder surgery can equal or improve upon the results obtained with a hospital administered program, changing the role of the physiotherapist from service provider to supervisor.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Surgery: Shoulder

Interventions

1. Supervised programme
2. Non-supervised programme

Trial stopped in 2003, no eligible patients.

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome(s)

Cost reduction in rehabilitation after shoulder surgery.

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/10/2003

Reason abandoned (if study stopped)

No eligible patients

Eligibility**Key inclusion criteria**

50 patients per year requiring rehabilitation after shoulder surgery.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria
