Additional identifiers

Study information

Scientific Title

Study objectives

Ghrelin treatment has beneficial effects on the disordered nutritional, cardiovascular and immunological physiology of dialysis patients.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Approved by the Riverside Research Ethics Committee on 01/02/2006, reference number: 05/Q0401/132

Study design

Randomised, double-blind, placebo-controlled, crossover trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Malnutrition or renal failure

Interventions

Subcutaneous ghrelin versus placebo

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Ghrelin

Primary outcome(s)

1. Blood pressure
2. Energy expenditure
3. Cytokine production

Key secondary outcome(s)

1. Food intake
2. Nutritional parameters

Completion date

01/12/2006

Eligibility

Key inclusion criteria

Dialysis patients at West London Renal and Transplant Centre, Hammersmith Hospital with evidence of malnutrition

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

1. Anaemia
2. Over 75 years of age
3. Recent illness

Date of first enrolment

13/03/2006

Date of final enrolment

01/12/2006

Locations

Countries of recruitment

United Kingdom

England
