Trial of alpha-interferon in chronic myeloid leukaemia and a comparison of busulphan and hydroxyurea for induction and maintenance

Submission date
19/08/2002

Recruitment status
No longer recruiting

Registration date
19/08/2002

Overall study status
Completed

Last Edited
15/11/2019

Condition category
Cancer

Study information

Scientific Title
Trial of alpha-interferon in chronic myeloid leukaemia and a comparison of busulphan and hydroxyurea for induction and maintenance

Study objectives
Not provided at time of registration.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration.

Primary study design
Interventional

Study design
Randomised controlled trial.

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Leukaemia (chronic)

Interventions
There are four treatment arms, clinicians may choose to randomise between only arms 1 and 2, 3 and 4, 2 and 4 or to randomise between all treatment arms.

1. Regimen A: Induction therapy with busulphan followed by maintenance therapy with busulphan plus alpha-interferon.
2. Regimen B: Induction therapy with busulphan followed by maintenance therapy with busulphan only.
3. Regimen C: Induction therapy with hydroxyurea followed by maintenance therapy with hydroxyurea plus alpha-interferon.
4. Regimen D: Induction therapy with hydroxyurea followed by maintenance therapy with hydroxyurea only.

Intervention Type
Drug

Phase
Not Specified

Drug/device/biological/vaccine name(s)
Alpha-Interferon , busulphan , hydroxyurea

Primary outcome(s)
Not provided at time of registration.

Key secondary outcome(s)
Not provided at time of registration.

Completion date

01/08/2005

Eligibility

Key inclusion criteria
1. Aged over 75 years with either Ph positive or Ph negative chronic myeloid leukaemia in chronic phase. Patients over 75 years or patients unwilling to accept alpha-interferon, may be randomised to busulphan or hydroxyurea, but not interferon or no interferon
2. Adequate renal function
3. No severe concurrent hepatic, renal, cardiovascular, organic brain disease or psychiatric illness
4. Patients with established blast cell crisis or extramedullary granulocytic sarcomas are to be excluded
5. Patients with accelerated phase or platelet count below that specified in the protocol are not eligible

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Senior

Sex
Not Specified

Total final enrolment
587

Key exclusion criteria
Not provided at time of registration.

Date of first enrolment
01/08/2000

Date of final enrolment
01/08/2005
