Study information

Scientific Title

Study objectives
This study will investigate patient acceptance, quality of life and survival/disease progression free interval in patients with locally advanced or metastatic prostate cancer in remission after six months treatment and disease control with androgen blockade.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration

Primary study design
Interventional

Study design
Randomised controlled trial

Study type(s)
Not Specified

Health condition(s) or problem(s) studied
Cancer: Prostate

Interventions
Intermittent vs continuous sex hormone suppression

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
Patient acceptance, quality of life and survival/disease progression.

Key secondary outcome(s)
Not provided at time of registration

Completion date
31/12/2003

Eligibility

Key inclusion criteria
200 patients recruited from Urological Oncology Clinical who have had six months androgen blockade.

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Not Specified

Sex
Male

Key exclusion criteria
Not provided at time of registration

Date of first enrolment
31/12/1997

Date of final enrolment
31/12/2003
