Primary study design

Interventional

Study design

Randomised controlled parallel group study

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Cardiovascular

Interventions

Focused cardiac rehabilitation service for South Asians vs conventional rehabilitation

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Quality of life data from the SF-36 MOS, uptake and compliance in the programme are the main outcome measures to determine the differences between the two arms of the trial.

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/09/2005

Eligibility**Key inclusion criteria**

150 patients

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria
