Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Other

Health condition(s) or problem(s) studied

Schizophrenia and other psychoses

Interventions

Randomised trial with three groups:

1. Computer intervention combining information from patient's medical record with general information about schizophrenia
2. Sessions with a community psychiatric nurse (CPN)
3. (Combination) First and last sessions with the CPN and remainder with the computer. Each intervention had five educational sessions.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Patient attendance, opinions, change in knowledge and psychological state; costs of the interventions and patients' use of NHS community services; modelling of costs for these three, and alternative, interventions.

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/12/1999

Eligibility**Key inclusion criteria**

112 patients with schizophrenia, in contact with community services; 67 completed follow up.

Participant type(s)

Patient

Healthy volunteers allowed

No
