Study information

Scientific Title

Comparison of efficiency of recombinant follicle stimulating hormone (rec-FSH) and highly purified urinary follicle stimulating hormone (FSH) among women undergoing assisted reproductive treatment (ART)

Study objectives
One of the most accepted patient friendly ovulation induction method for patients undergoing IVF seems to be protocols with gonadotropin-releasing hormone (GnRH) antagonist. Conceivably benefits of luteinising hormone (LH) activity and low cost may favor urinary gonadotropins.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Ethics approval received from the Ethics Committee of the German Hospital in Istanbul on the 2nd May 2008 (ref: 17).

Study design
Prospective randomised controlled trial

Primary study design
Interventional

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Primary infertility

Interventions
Group A: starts with recombinant FSH (r-FSH)
Group B: starts with only urinary FSH (u-FSH)

In both groups GnRH antagonist will be initiated when leading follicle is 13 mm or on day 6 of stimulation.

Interventions:
Serum assays of baseline FSH, LH, oestrogen (E2), progesterone, testesterone on day 2 of cycle and serum assays of LH, E2, testosterone and progesterone on human chorionic gonadotropin (HCG) day and ovum pick-up (OPU) day.

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
Number of oocytes retrieved, 12 days following embryo transfer.

Key secondary outcome(s))

1. Pregnancy rate
2. Implantation rate
3. Duration of stimulation
4. Gonadotropin consumption

All secondary outcomes measured at 12 days following embryo transfer.

Completion date
30/11/2008

Eligibility

Key inclusion criteria
1. Women less than 42 years old
2. Healthy

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Sex
Female

Key exclusion criteria
1. Any of the ovary removed surgically
2. Surgically retrieved spermatozoa
3. FSH level over 13 mIU/ml

Date of first enrolment
25/06/2008

Date of final enrolment
30/11/2008
