Study information

Scientific Title

Study objectives

A trial of laparoscopic surgery versus endoscopic dilatation in the treatment of achalasia of the oesophagus.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Digestive system: achalasia of the oesophagus

Interventions

Laparoscopic surgery versus endoscopic dilatation

Intervention Type

Other

Phase

Not Applicable

Primary outcome(s)

1. Symptom control
2. Side effect profile

Key secondary outcome(s)

Not provided at time of registration

Completion date

31/01/2005

Eligibility**Key inclusion criteria**

Not provided at time of registration

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria
