Study information

Scientific Title
Tolerability of the intravenous immunoglobulin Octagam® 10%

Study objectives

Octagam® 10% is well tolerated in routine clinical use in the treatment of primary or secondary immunodeficiencies or in the immunomodulation of autoimmune diseases.

Ethics approval required
Old ethics approval format

Ethics approval(s)
As the procedures during this observational study do not interfere with the patient's usual treatment and monitoring of treatment, this study is not regarded as a clinical study as defined by EU Directive 2001/20/EC. Therefore, approval by an Independent Ethical Committee is not required.

Primary study design
Observational

Study design
Non-interventional prospective multi-centre observational cohort study

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Primary or secondary immunodeficiencies, immunomodulation in autoimmune diseases

Interventions
Treatment with Octagam® 10% will be documented. This includes data about the patient's disease, age, gender, weight, concomitant medication or illness. For each application, the date and duration of infusion, dose, batch number(s) and the absence or occurrence of an adverse drug reaction (ADR) will be recorded. In case of an ADR, additional detailed information about the reaction will be recorded. If available, laboratory data about the efficacy of treatment should also be documented. No investigations must be initiated for the purpose of this non-interventional trial.

The number of treatments with Octagam® 10% for each patient cannot be defined due to the different indications where it is used. Therefore some patients will be treated and observed for a few weeks and others for several months or years. For this reason, there are no specified timepoints for the outcomes of this trial.

Intervention Type
Drug

Phase
Not Specified

Drug/device/biological/vaccine name(s)
Octagam® 10%

Primary outcome(s)
To observe the tolerability of Octagam® 10% in different indication groups in routine clinical practice

Key secondary outcome(s)
Data about the efficacy of Octagam® 10%

Completion date
14/09/2013

Eligibility

Key inclusion criteria
Patients of any age and gender who receive treatment with Octagam® 10%

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
All

Sex
All

Key exclusion criteria
Patients with known contraindications to Octagam® 10%

Date of first enrolment
15/09/2008

Date of final enrolment
14/09/2013
