Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Cardiovascular

Interventions

Patients were enrolled either into educational classes and exercise training 6 h/week for 8 weeks plus conventional medical management or conventional medical therapy alone. Costs of equipment and staff salary were estimated. A set of quality of life (QOL) questionnaires was used to collect data by interviewing.

Intervention Type
