Study information

Scientific Title

Study objectives

Does intervention reduce morbidity and what is the prevalence?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Signs and Symptoms: Dysphagia

Interventions

Cluster randomisation and speech therapy assessment and intervention. 2 Arms:

1. No extra speech therapy input. No treatment or usual treatment
2. Increased speech therapy input

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Quality of life, contacts with medical staff, infection rate.

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/02/2007

Eligibility**Key inclusion criteria**

Nursing home residents.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Senior

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/02/2004

Date of final enrolment

01/02/2007
