Study information

Scientific Title

Acronym

CPC Study

Study objectives

It was hypothesised that additional community-based prenatal support from nurses and home visitors would improve the use of prenatal resources among women at low medical risk, including those experiencing challenges such as poverty, language barriers, abuse, and low self esteem.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Conjoint Health Ethics Research Board, Calgary Health Region and University of Calgary.
Approval date: June 7, 2001(ref: #15763).

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Quality of life

Health condition(s) or problem(s) studied

Pregnancy

Interventions

Pregnant women randomised to:

1. Standard of prenatal care,
2. Standard of prenatal care plus supplementary nurse, or
3. Standard of care plus supplementary nurse and home visitor.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

1. Resource utilisation
2. Provision of information

Key secondary outcome(s))

1. Mental health
2. Lifestyle choices
3. Satisfaction with care

Completion date

01/06/2004

Eligibility

Key inclusion criteria

1. More than or equal to 18 years
2. Speak English, French, Punjabi, Urdu, Arabic, Cantonese, Mandarin
3. Live in city limits
4. Not attended first prenatal class prior to intake interview

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Lower age limit

18 years

Sex

Female

Key exclusion criteria

1. Less than 18 years
2. Could not speak English, French, Punjabi, Urdu, Arabic, Cantonese, or Mandarin
3. Live outside city limits
4. Attended first prenatal class prior to intake interview

Date of first enrolment

01/04/2001

Date of final enrolment

01/06/2004
