Study information

Scientific Title
Comparison of the laryngeal mask airway Ambu Aura Once™ and the i-gel™ in elective anaesthetised and ventilated paediatric patients

Acronym
Paediatric i-gel

Study objectives
H0 = Mean Airway seal pressure Ambu ≥ Mean Airway seal pressure i-gel.
H1 = Mean Airway seal pressure Ambu < Mean Airway seal pressure i-gel.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Ethics Committee of Berne, approved on 02/02/2009 (ref: 018/09)

Primary study design
Interventional

Study design
Prospective randomised gold-standard controlled single-blinded (patient) trial

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Airway management in paediatric patients

Interventions
According to randomisation, patients will be ventilated by either one of the masks involved in the study: either the paediatric sized i-gel™ or the paediatric sized Ambu Aura Once™. No other interventions.

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
Oropharyngeal leak pressure

Key secondary outcome(s)
1. First attempt success rate
2. Time necessary for completion of first attempt
3. Insertion success of a gastric catheter
4. Fiberoptic laryngeal view
5. Adverse events

Completion date
15/08/2010

Eligibility

Key inclusion criteria

1. Patients of both genders, aged 0-17 years
2. Weight of 5-50 kg
3. American Society of Anaesthesiologists (ASA) physical status I-II
4. Scheduled at the University Hospital of Bern for elective surgery planned for general anaesthesia not requiring tracheal intubation

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Child

Upper age limit
17 Years

Sex
All

Key exclusion criteria
1. Planned operation time >4h
2. Risk of aspiration (non-fasted, massive gastroesophageal reflux disease, gastrointestinal stenosis or stricture)
3. Known difficult airway (difficult mask ventilation or difficult laryngoscopy, Cormack-Lehane grade >2)
4. Congenital malformations involving the respiratory tract
5. Cervical spine disease
6. Upper respiratory tract symptoms in the previous 14 days
7. Preoperative sore throat
8. Patients with non-German-speaking parents or refusing to participate

Date of first enrolment
15/08/2009

Date of final enrolment
15/08/2010
