Study information

Scientific Title
Allopurinol in the prevention of superficial bladder tumour recurrence

Acronym
RAPOR

Study objectives
Allopurinol reduces the risk of recurrence of superficial bladder cancer.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Being considered for approval by the Nottingham REC 2 (reference: UHL 9950 ETHICS 06/Q2501/64), final approval received 03/05/2006.

Primary study design
Interventional

Study design
A single centre, randomised placebo controlled trial

Study type(s)
Prevention

Health condition(s) or problem(s) studied
Superficial transitional cell carcinoma of the urinary bladder

Interventions
Allopurinol 100 mg once daily with food or placebo drug

Intervention Type
Drug

Phase
Phase II

Drug/device/biological/vaccine name(s)
Allopurinol

Primary outcome(s)
Time to biopsy-proven bladder tumour recurrence whilst taking allopurinol 100 mg once daily or placebo.

Key secondary outcome(s)
To evaluate the tolerability of allopurinol in patients with superficial bladder cancer, and to identify any adverse events.

Completion date
01/01/2016

Reason abandoned (if study stopped)
Participant recruitment issue

Eligibility

Key inclusion criteria
1. Patients with solitary Transitional Cell Carcinoma
(TCC) Ta or T1 bladder tumour (Grade one to two) that recurs at three months
2. Patients with multifocal TCC Ta bladder tumours (Grade one to two) that do not recur at three months
3. Patients with multifocal TCC Ta bladder tumours (Grade one to two) that recurs at three months

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Not Specified

Sex
All

Key exclusion criteria
1. Tumours with a higher risk of progression to muscle-invasive bladder cancer
2. Non-TCC bladder cancer
3. Multifocal T1 or Grade three TCC
4. Carcinoma in situ
5. More than one instillation of intravesical chemotherapy
6. Intravesical Bacillus Calmette-Guerin (BCG) therapy

Other reasons:
1. Current azathioprine or mercaptopurine treatment
2. Serum creatinine more than 200 µmol/l
3. Pregnant
4. Breast feeding
5. Aged under 18 year of age
6. Previous Allopurinol hypersensitivity
7. Current allopurinol treatment

Date of first enrolment
01/06/2006

Date of final enrolment
01/01/2016
