Additional identifiers

Study information

Scientific Title

Acronym
The Viborg Study

Study objectives

Screening older men for abdominal aortic aneurysms (AAA) reduces AAA specific mortality and is cost effective

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Screening

Health condition(s) or problem(s) studied

Abdominal aortic aneurysm

Interventions

Invitation to abdominal aortic ultrasonography versus no screening

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

AAA specific mortality, life years gained, and costs

Key secondary outcome(s)

Operations for AAA

Completion date

31/12/2008

Eligibility**Key inclusion criteria**

Men born 1921-1933 living in Viborg County, Denmark, in 1994-1998

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Senior

Sex

Male

Key exclusion criteria

Does not meet inclusion criteria

Date of first enrolment

01/04/1994

Date of final enrolment

31/12/2008

Locations**Countries of recruitment**

Denmark

Study participating centre**Vascular Research Unit**

Viborg

Denmark

8800
