Study information

Scientific Title

Acronym
CAST

Study objectives

Effect of hand-signed versus scanned signatures on a covering letter on response rates to postal surveys.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Caesarean section surgical techniques

Interventions

Hand-signed versus scanned signatures on a covering letter asking for the return of a questionnaire enquiring about currently used caesarean section techniques

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome(s)

Response rate

Key secondary outcome(s)

Not provided at time of registration

Completion date

31/10/1999

Eligibility**Key inclusion criteria**

All practicing members of the Royal College of Obstetricians and Gynaecologists

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Female

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/02/1999

Date of final enrolment

31/10/1999

Locations

Countries of recruitment

United Kingdom

England

Study participating centre
