Study information

Scientific Title
How can we reduce the frequency of unscheduled smear rates?

Study objectives

To improve the procedural effectiveness and efficiency of the NHS Cervical Screening Programme

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Screening

Health condition(s) or problem(s) studied

Cervical neoplasia, cervical smear

Interventions

Not provided at time of registration

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

For each intervention, the rate of unscheduled smears will be compared between the intervention and control arms.

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/12/2002

Eligibility

Key inclusion criteria

Women aged 25-64 who fulfill study criteria. Eligible women identified from the Cytology database held by the Lancashire and South Cumbria Agency.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

Female

Key exclusion criteria

Does not match inclusion criteria

Date of first enrolment

01/09/1999

Date of final enrolment

01/12/2002
