Study information

Scientific Title

Study objectives
What are the barriers to implementing psychological treatments for schizophrenia and how might these be overcome?

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration

Primary study design
Interventional

Study design
Cluster randomised trial

Study type(s)
Not Specified

Health condition(s) or problem(s) studied
Mental and Behavioural Disorders: Schizophrenia

Interventions
Cluster randomised trial of a training and implementation programme of the NICE guideline across community mental health teams in SLaM

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
Numbers of patients eligible, offered and accepting NICE guideline compliant treatment. Measures of resource (capacity in terms of number of professionals with appropriate skills, availability of training and support etc), measures of structural and personal barriers to implementation. Patient awareness, need and demand for the psychological treatments specified in NICE.

Key secondary outcome(s)
Not provided at time of registration

Completion date
30/09/2007

Eligibility

Key inclusion criteria
1. All professionals in the clinical teams
2. 50 patients in each of two of these teams

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Not Specified

Sex
Not Specified

Key exclusion criteria
Not provided at time of registration

Date of first enrolment
01/05/2004

Date of final enrolment
30/09/2007

Locations

Countries of recruitment
United Kingdom

England

Study participating centre
Adamson Centre for Mental Health
