Study information

Scientific Title
Assessment of new portable chest drain system versus conventional chest tube drainage in patients with primary spontaneous pneumothorax requiring pleural drainage

Study objectives
Whether patients with pneumothorax can be managed effectively as outpatients with new portable chest drain (Vent).

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration

Primary study design
Interventional

Study design
Randomised open label

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Respiratory: Pleural drainage

Interventions
Randomised open label design standard in patient drain or the Vent with option of early discharge. New portable chest drain system versus conventional chest tube drainage.

Intervention Type
Device

Primary outcome(s)
1. Pain scale
2. Patient satisfaction
3. Length of hospital stay and economic savings
4. Complications of drainage

Key secondary outcome(s)
1. Time to resolution of pneumothorax
2. Successful resolution
3. Failures requiring surgery

Completion date
30/11/2004

Eligibility

Key inclusion criteria

Not provided at time of registration

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Not Specified

Sex
Not Specified

Key exclusion criteria
Not provided at time of registration

Date of first enrolment
10/08/2001

Date of final enrolment
30/11/2004
