Study information

Scientific Title

Study objectives

To determine whether taking bowel preparation (Citramag and Senna) or a medicine to speed up transit through the stomach (Metoclopramide) will improve the quality of images seen, increase the transit through the small bowel, and increase the rate of completion of capsule endoscopy.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Surgery: Capsule endoscopy

Interventions

Randomised controlled study.

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Citramag and Senna or Metoclopramide

Primary outcome(s)

Bowel visualisation, stomach and small intestinal transit time and capsule study completion rates (to the caecum)

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/12/2007

Eligibility**Key inclusion criteria**

Not provided at time of registration

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/12/2005

Date of final enrolment

01/12/2007

Locations

Countries of recruitment

United Kingdom

England

Study participating centre

Wolfson Unit for Endoscopy

Harrow
