Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration

Study design
Randomised controlled trial

Primary study design
Interventional

Study type(s)

Health condition(s) or problem(s) studied
Bladder (advanced)

Interventions
1. Schedule A: Radiotherapy, an accelerated fractionation schedule of 60.8 Gy given in thirty-two fractions over 26 days. Radiotherapy is given twice daily (morning dose of 1.8 Gy and 2.0 Gy in the afternoon) as 22.8 Gy in twelve fractions over 8 days, followed by a 3 to 6 day gap, followed by 38 Gy in twenty fractions over 2 weeks.
2. Schedule B: Radiotherapy, a conventional fractionation schedule of 64 Gy given in thirty-two fractions over 6.5 weeks. Radiotherapy is given once per day 5 days per week.

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
Not provided at time of registration

Key secondary outcome(s))
Not provided at time of registration

Completion date
31/12/1998

Eligibility

Key inclusion criteria
1. Stage T2 or T3 NXMO carcinoma of the bladder defined either by clinical findings or by histopathology
2. If nodes are assessed N1 patients (single node <2 cm) are eligible, N2 and N3 patients are excluded
3. Patients with severe concurrent general medical illness especially those with inflammatory bowel disease, other malignancies (except skin cancer), recent myocardial infarction (within 3 months) or previous major pelvic surgery are excluded

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Not Specified

Sex

Key exclusion criteria
Not provided at time of registration

Date of first enrolment
01/01/1988

Date of final enrolment
31/12/1998
