Study information

Scientific Title

Study objectives

What are the follow-up care needs of people with colorectal cancer? Can a telephone intervention, currently being evaluated for people with breast cancer, have wider applicability and be relevant for people with colorectal cancer?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Added 05/11/08: Cumbria and Lancashire A, 13/03/06, REC reference 05/Q1308/46.

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Cancer: Colorectal

Interventions

Interviews with patients, postal administration of questionnaire and exploratory trial with a small randomised controlled trial. For the RCT part, patients recruited to the telephone pare will be given a hospital card with the date and time when a trained specialist colorectal cancer nurse will call them. This will be compared to patients being seen at the hospital in the normal way.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

1. Patients views and preferences on follow-up care after treatment for colorectal cancer.

Added 05/11/08:

2. Satisfaction with information received
3. Satisfaction with follow-up service provision
4. Psychological morbidity

Key secondary outcome(s)

Added 05/11/08:
Cost effectiveness

Completion date

01/10/2007

Eligibility

Key inclusion criteria

Interviews with outpatients at surgical and oncology clinics, 30 patients; questionnaires with patients on follow-up treatment, 150-200 patients; RCT with outpatients at surgical and oncology clinics, 60 patients.

Inclusion criteria for RCT participants:

1. Adults >18
2. Aware of diagnosis of colorectal cancer
3. Complete treatment for colorectal cancer
4. No evidence of local or regional recurrence
5. No current clinical problems
6. In addition for RCT stage: access to a telephone

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Lower age limit

18 Years

Sex

Not Specified

Key exclusion criteria

1. Not aware of diagnosis of colorectal cancer
2. Treatment ongoing
3. Evidence of recurrent disease
4. Clinical problems that warrant hospital visits
5. Patient already taking part in a clinical trial
6. Hard of hearing/deaf with no telephone adaptation system in operation. No telephone access
