Study information

Scientific Title

Study objectives

To determine the effect of fish oil dietary supplements and aspirin on platelet angiotensin II binding.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Cardiovascular: Hypertension

Interventions

Normotensive and hypertensive women will be randomly allocated in a double blind manner to one of the four groups: fish oil, aspirin, fish oil and aspirin and placebo.

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

fish oil, aspirin

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/06/2004

Eligibility**Key inclusion criteria**

128 women in total will be recruited, 32 patients to each of the four treatment arms. Half the women will be hypertensive and the other half normotensive.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

Female

Key exclusion criteria
