Study information

Scientific Title

Study objectives

Can nutritional state of CAPD patients be improved by altering diet to achieve recommended energy intake?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Urological and genital diseases: Renal disease

Interventions

1. Dietary intervention from Research Dietician
2. Conventional dietary advice

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

1. Energy intake expressed as calories/kg body weight
2. Serum albumin, Leptin and IGF
3. Anthropometry - weight, skin fold thickness % body fat
4. Subjective Global Assessment Score

Key secondary outcome(s)

Not provided at time of registration

Completion date

20/06/2003

Eligibility

Key inclusion criteria

Patients from the CAPD population treated by the Wessex renal unit.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/10/2001

Date of final enrolment

20/06/2003
