Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Diagnostic

Health condition(s) or problem(s) studied

Sepsis in neonates and critically ill children

Interventions

New laboratory markers for infection given to physicians in charge of the patients in order to improve diagnostic work-up.

Intervention Type

Other

Phase

Not Applicable

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

31/12/2003

Eligibility**Key inclusion criteria**

Newborns and critically ill paediatric patients of a tertiary University Children's Hospital

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Other

Sex

All

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/01/2003

Date of final enrolment

31/12/2003

Locations**Countries of recruitment**
