Study information

Scientific Title

Study objectives

Is using a sealing device superior to femoral compression for haemostasis following angiography or angioplasty?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Haemostasis

Interventions

Randomised controlled trial. Sealed envelopes will be used with the different randomisations.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

The time to obtain haemostasis and development of any haemotoma during a 1 week period.

Key secondary outcome(s)

Not provided at time of registration

Completion date

26/02/2004

Eligibility**Key inclusion criteria**

300 patients

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Does not match inclusion criteria

Date of first enrolment

26/02/2003

Date of final enrolment

26/02/2004

Locations**Countries of recruitment**

United Kingdom

England

Study participating centre**Radiology Department**

Oxford

United Kingdom

OX3 9DU

Sponsor information**Organisation**

Department of Health (UK)

Funder(s)**Funder type**

Hospital/treatment centre

Funder Name

Oxford Radcliffe Hospitals NHS Trust (UK)
