Study information

Scientific Title

Study objectives

How does psychological group therapy affect women with Mayer-Rokitansky-Kuster-Hauser (MKHR) syndrome?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Mayer-Rokitansky-Kuster-Hauser Syndrome

Interventions

Randomised controlled psychological group therapy trial.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

To evaluate the effect of a psychological group therapy programme on women with MRKH

Key secondary outcome(s)

No secondary outcome measures

Completion date

16/11/2005

Eligibility

Key inclusion criteria

Women affected with MRKH

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

Female

Key exclusion criteria
