Primary study design

Interventional

Study design

Randomised controlled trial

Study type(s)

Quality of life

Health condition(s) or problem(s) studied

Improving health care in nursing practices

Interventions

Three interventions:

1. Audit and feedback educational outreach
2. Combination of audit and feedback and educational outreach compared with
3. Printed educational materials (control)

The process and outcomes of care for patients with urinary incontinence and the obstacles that may influence implementation will be assessed before and after the interventions. The cost implications of the different approaches will be assessed.
