Study information

Scientific Title

Study objectives

To compare the ease of use and pregnancy rates of In-Vitro Fertilisation (IVF) cycles by using Wallace and Cook's embryo transfer catheters for embryo transfer.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Primary study design

Interventional

Study design

Prospective single centre randomised controlled trial

Study type(s)

Treatment

Health condition(s) or problem(s) studied

In vitro fertilisation (IVF)

Interventions

Added 27/08/10:

Women undergoing a fresh ET were randomized at the time of ET to either the Cook K-Jet or Wallace embryo transfer catheter. The randomization was stratified according to age and the number of previous ETs.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Pregnancy rates.

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/10/2003

Eligibility**Key inclusion criteria**

IVF patients

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

Female

Key exclusion criteria

Added 27/08/10:

1. Age more than 40 years
2. High basal Follicle Stimulating Hormone (FSH)
3. A previous difficult ET or more than six previous ETs

Date of first enrolment

01/10/2002

Date of final enrolment

01/10/2003

Locations**Countries of recruitment**

United Kingdom

England
